mkdir GitExperiment
cd GitExperiment
code .

git init

Create a file named `hello.txt` in VS Code.

Add some content:

```
Hello! This is my first Git experiment.
Learning Git and GitHub.
```

git status

git add .

git commit -m "Initial commit"

Step 7: Create a GitHub Repository

1. Open GitHub.
2. Log in to your account.
3. Click the New Repository (+) option.
4. Enter repository name: `GitExperiment`.
5. Select Public or Private.
6. Click Create Repository.

git remote add origin https://github.com/username/GitExperiment.git

git branch -M main

git push -u origin main

git pull origin main

git log

git log --oneline

For cloning we can use

git clone https://github.com/username/repository.git

All commands

mkdir GitExperiment
cd GitExperiment

git init

git status

git add .

git commit -m "Initial commit"

git branch -M main

git remote add origin <repository-url>

git push -u origin main

git pull origin main

git log
